

# COMPOST BASED ON CHELATED IRON

Against ferric chlorosis

Against the  
yellowing of  
the leaves

Greener

Crops

Citrus fruits

Potted plants

Ornamental  
plants

## TITRATION

General sale

## COMPOSITION per 100 g

Iron chelate (EDTA)  
Iron (Fe) soluble in water 5%  
Iron (Fe) chelated with EDTA 5%  
Chelating agent: EDTA  
pH range that guarantees a good stability of the chela-  
ted fraction: 4-9

FORMULATION: Powder

RAW MATERIALS: Iron chelate (EDTA)

## FEATURES

Chelated iron to prevent and cure nutritional deficiencies due to yellowing of the leaves (chlorosis), structural mal-  
formations and deficiency of vegetative development.
