Ants

### REGISTRATION

BIOCIDE, DEPENDS ON COUNTRY

### COMPOSITION per 100 g

Pure imidacloprid  
Co-formulants as needed up to

FORMULATION: Gel

### FEATURES

GEL ANTS TRIANGULAR TRAP is a ready-to-use product containing a specific insecticide gel for all types of ant that feed on sugar and are considered a pest. GEL ANTS TRIANGULAR TRAP has been designed to offer total effectiveness in tackling ants both in indoors and outdoors. Its shape was designed to be positioned more easily along ant paths and can fit snugly against walls and in corners.

GEL ANTS TRIANGULAR TRAP has a delayed deadly effect, acting within a few hours. Worker ants thus have the time necessary to transport the bait back to their nest and distribute it among other worker ants (trophallaxis) thus feeding both the larvae and the queen: once the queen has been killed, the colony is extinguished.
